

# Krka National Park

## Krka National Park

Located on the Krna River in southern Croatia Krka National park is a vast area of exceptional pristine natural beauty. With preserved ecosystems home to many birds and animals. From the foothills of the Dinara mountain range the river descends over seven waterfalls, a spectacular sight with a drop over karst formations of 242 metres.

The primary focus of Krka national parks is **preservation**, **science**, **culture** and **education**, it has opened to sustainable tourism. With exceptional trails for hiking in this **magical natural park** and **boat** rides down the Krna river. With your **motorhome**, RV or campervan you can set up camp at one of the many campsites and live close to nature.
